

Forest Plan Amendment

CROFT

2010 – 2020

Indicative Future Species

-  Restored Wood Pasture
-  Native Broadleaves
-  Evergreen Conifer
-  Ash & Native Broadleaf mix

Woodland composition in around 80 years time maybe something like this:

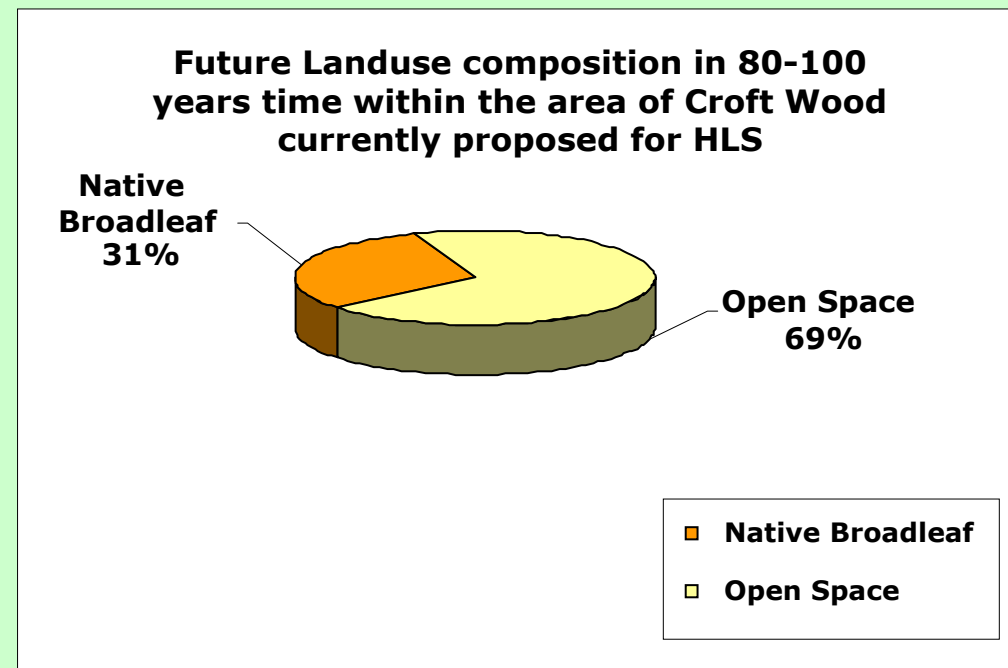

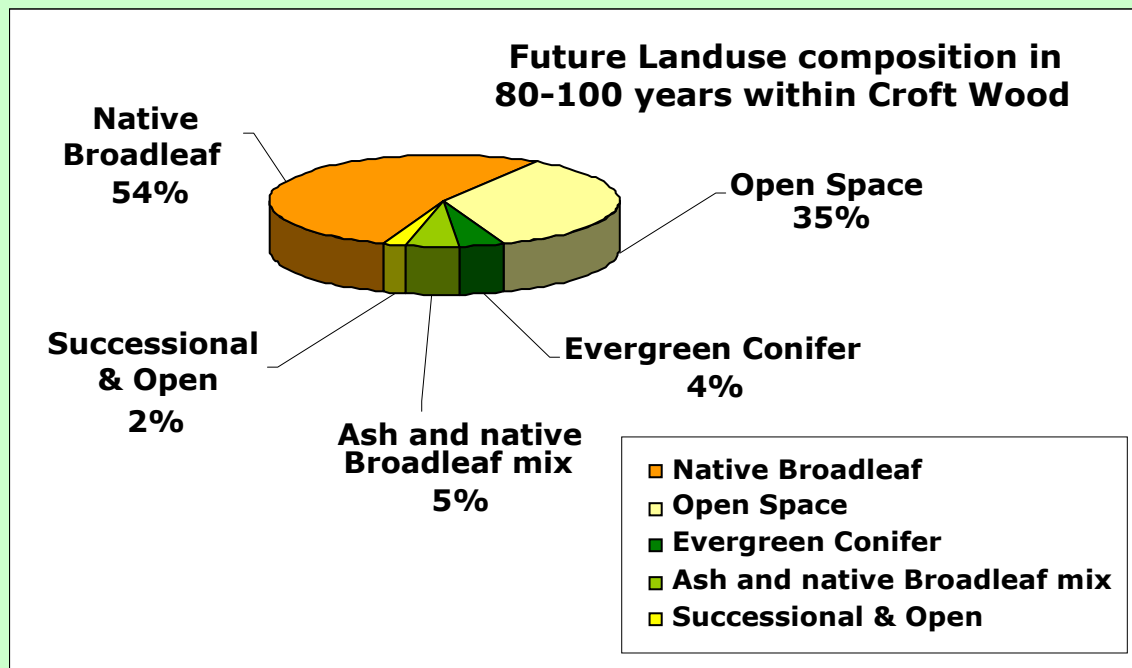

| | Area in Ha | |
|-------------------------------------|----------------|---------------------|
| | CROFT OVER ALL | CROFT HLS AREA ONLY |
| Native Broadleaf | 78.6 | 13.1 |
| Open Space | 52.0 | 29.7 |
| Ash and native Broadleaf mix | 7.3 | ---- |
| Evergreen Conifer | 6.1 | ---- |
| Successional & Open | 3.0 | ---- |
| | 147.0 | 42.8 |

Conifer areas have now been replaced with a varying structure of native Broadleaves.

Temporary conifer retentions now replaced with mixed Native Broadleaf linkages for Bats.

The mature conifer that used to surround veteran Oak Pollards has now been removed and Native Broadleaves have been established. Some of which may become future veteran pollards. Wood Pasture has been restored across the remainder of the site.

Pie charts showing land use defined by Woodland Type

Forestry Commission woodlands have been certified in accordance with the rules of the Forest Stewardship Council.

| Description | coupe ref | HLS area | Areas outside of HLS | comments | |
|-------------------------------------|----------------|--------------|----------------------|---|----------------|
