

## APPENDIX 4 —Consultation Record

Consultee Name	Consultee Comment	FC Response
<b>STATUTORY</b>		
Cornwall CC	No Response	
Natural England	No Response	
Environment Agency	No Response	
Forest Services	<p>Really disappointed that climate change is not cross cutting theme both within the plan and the feedback form (Climate Change (e.g. carbon capture &amp; flood alleviation) where is adaptation?</p> <p>I see no mention at all of testing the plan using tools such as ESC.</p> <p>There is a mention of some species diversification both conifer and broad-leaves.</p> <p>The need for frequent interventions in broadleaves to encourage adaptive processes and or supplementary planting with more southerly origins not mentioned.</p>	<p>Pages 5 and 7 now make the following statement: <i>The long term aims of management here are to continue the process of restoring Ancient Woodland while increasing resilience to climate, pest and disease risks, and to develop the forest for people.</i></p> <p>The feedback form does not make reference to adaptation, this will reviewed at the time of next consultation.</p> <p>ESC is not mentioned as it is one of management tools which are used as standard.</p> <p>Comment disputed, Page 15 makes the following statement: <i>The re-introduction of coppicing will help to inject natural diversity and thus resilience into the woodland in light of climate change and increased pests and diseases.</i></p>
Cornwall Historic Environment	No Response	
Duloe Parish Council	No Response	
St Pinnock Parish Council	No Response	
Lanreath Parish Council	No Response	
<b>NGOs</b>		
Forest Holidays	No Response
