Rogate Woodlands Long Term Vision

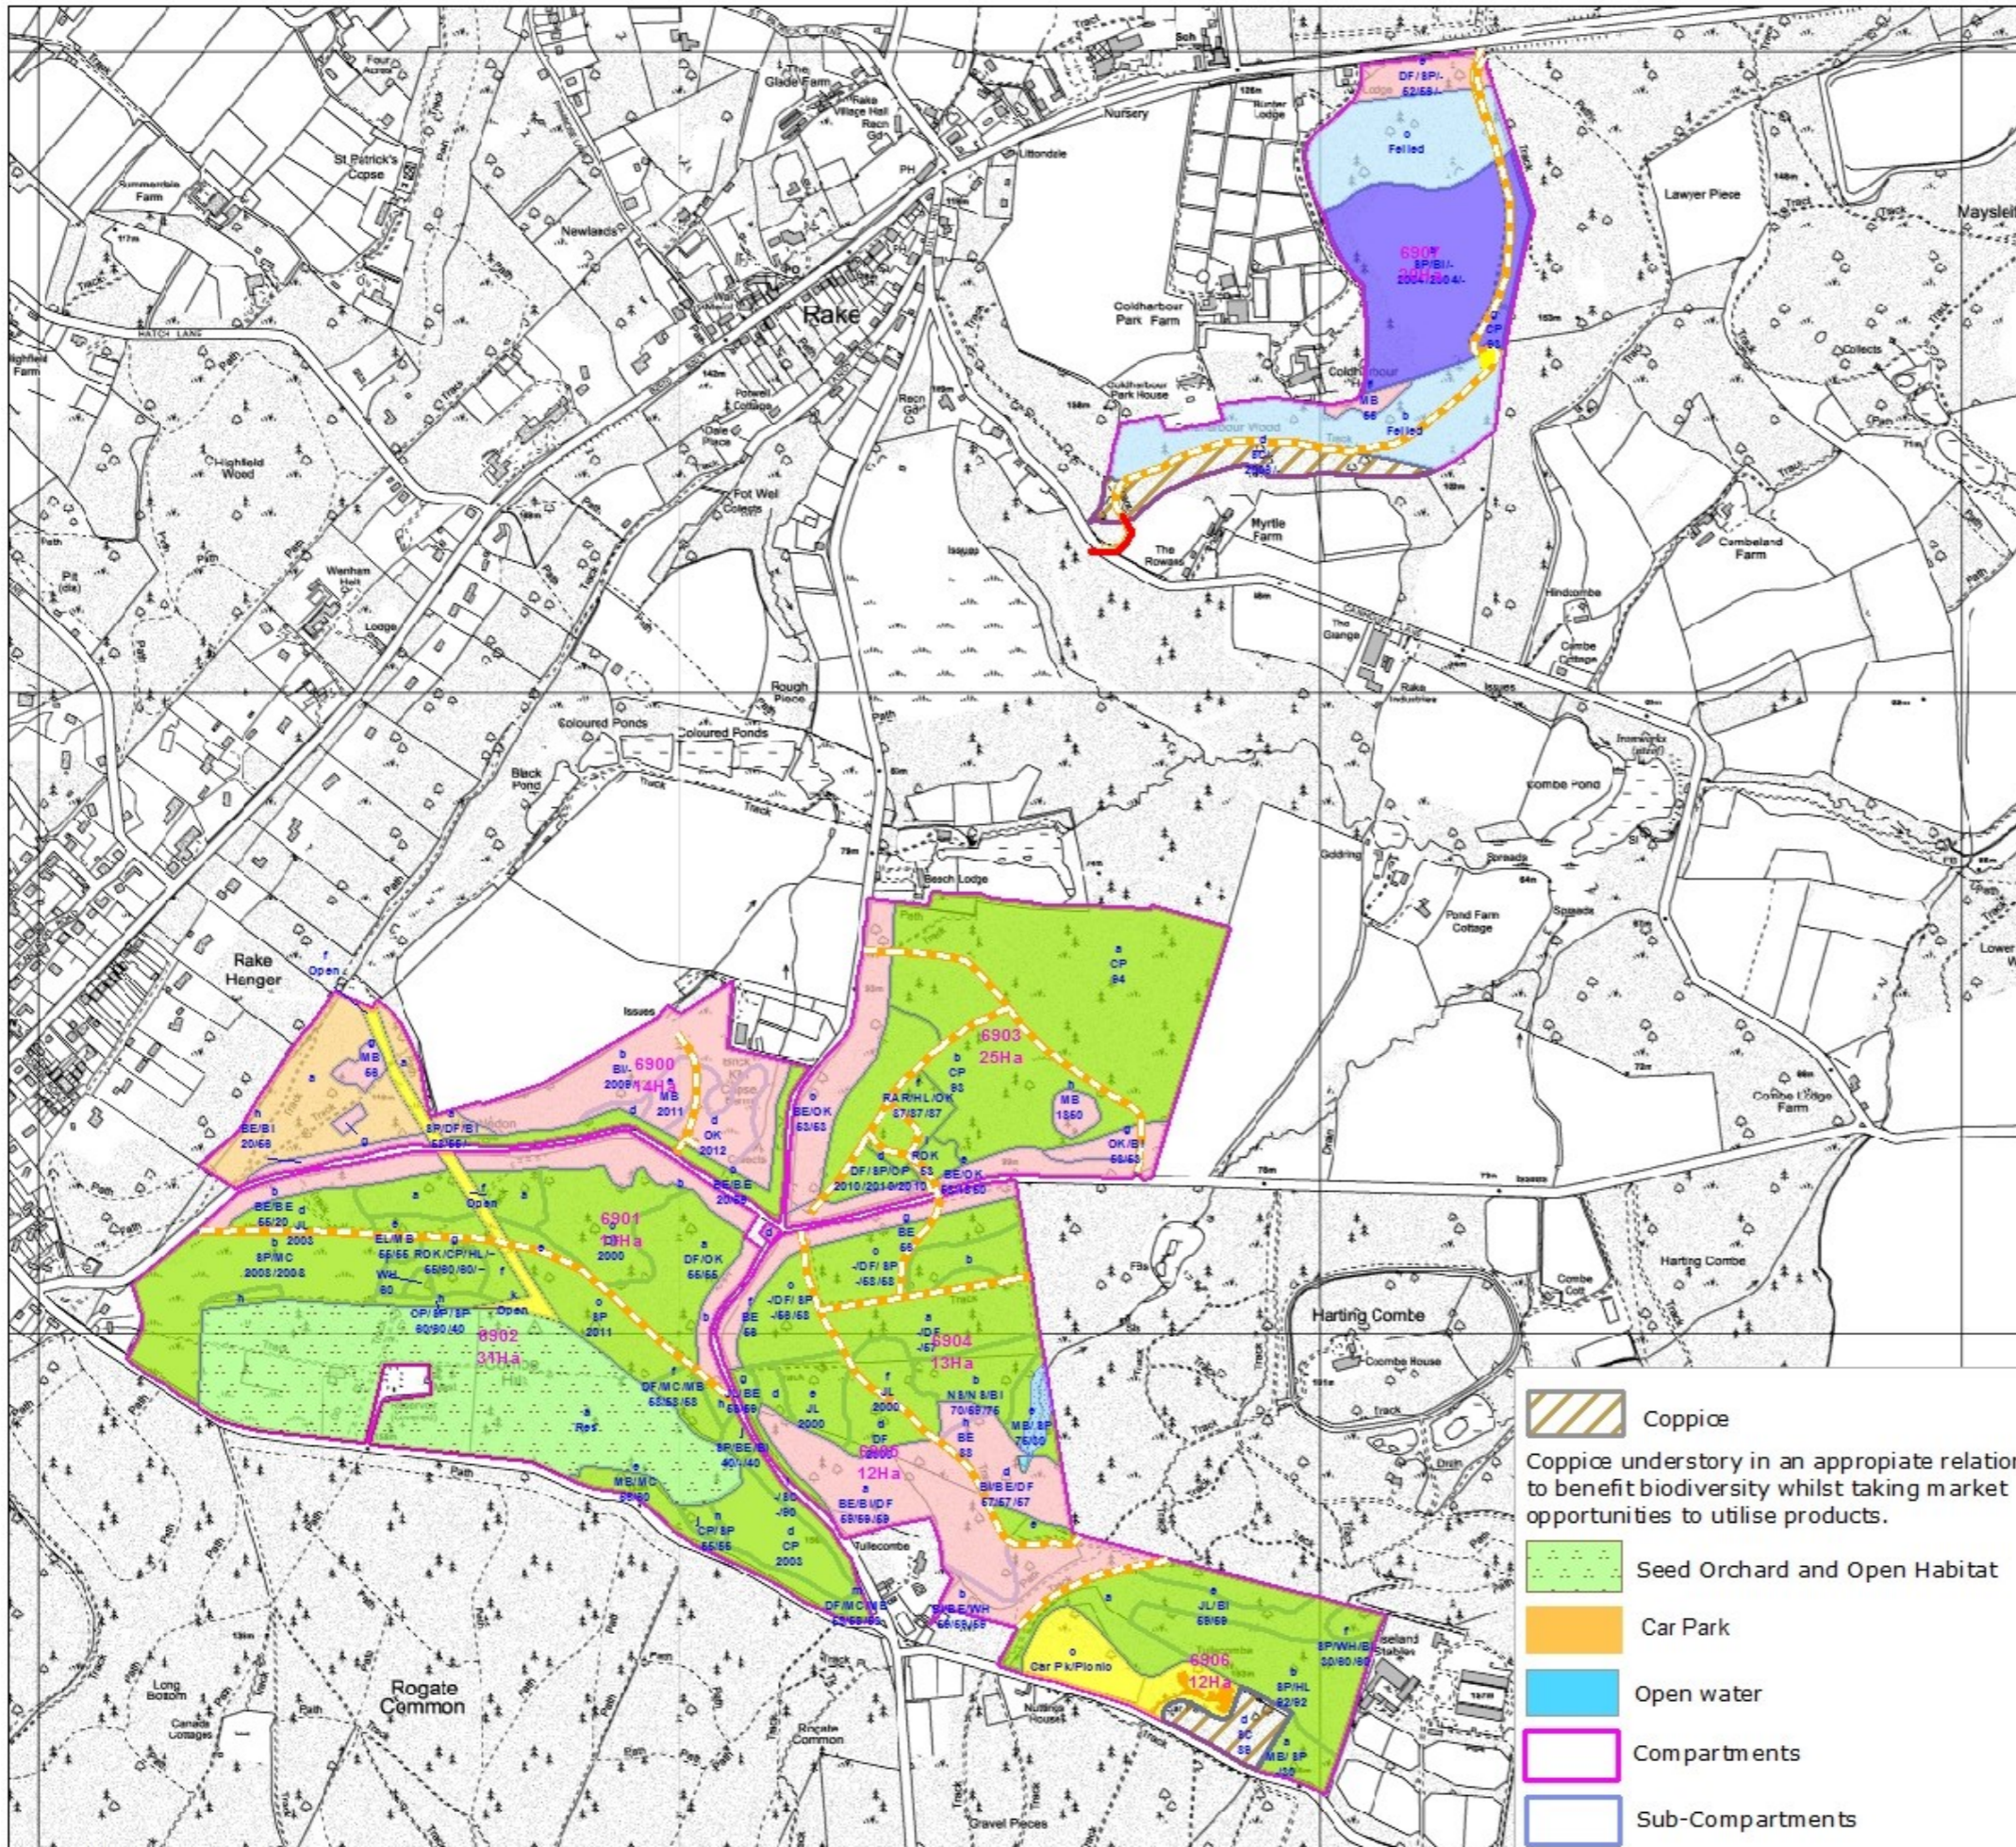

- Key**
-  Managed Native Woodland
Native broadleaved woodland.
Predominantly (>80%) native or honorary-native species.
 -  Mixed Woodland Management
Woodland consisting of a mixture of native and non-native tree species, neither of which dominates more than 80% of the canopy.
 -  Wet Woodland Management
Wet woodland and riverine habitat
 -  Biodiversity Corridors
Open ride and road network, connecting habitats and woodland for enhanced biodiversity.
 -  Manage as open habitat
 -  Coppice
Woodland coppiced under a suitable rotation to benefit biodiversity and to take opportunities to supply niche markets
 -  Seed Orchard and Open Habitat
 -  Open water
 -  Buildings
 -  Car Park
 -  Management Access Route

Rogate Woodlands Habitat Restoration & Felling

Key

- Mixed Woodland Management**
Manage under an appropriate shelterwood system. Favour best tree, focussing on the production of quality timber and species diversity.
- Native Broadleaf Woodland Restoration**
Manage under an appropriate shelterwood system. Favour best native tree, focussing on the production of quality timber and the gradual reduction of non native species to 20% of the canopy or less
- Native Broadleaf Woodland Management**
Manage under an appropriate shelterwood system, favouring the best native tree and focussing on the production of quality timber
- Road/Ride Edge Management**
Enhance the woodland edge developing a scalloped and graded structure in accordance with best practice guidelines.
- Wet Woodland Management**
Manage under an appropriate shelterwood system. Favour best native tree, focussing on the development of wet woodland and riverine habitat characteristics.
- Establishment Phase**
Natural regeneration from surrounding native seed source
- Clearfell Beyond 2046**
Silvicultural thinning until clearfell then restock with native broadleaves.
- Manage as open habitat**
- Management Access Route**
- Coppice**
Coppice understory in an appropriate relation to benefit biodiversity whilst taking market opportunities to utilise products.
- Seed Orchard and Open Habitat**
- Car Park**
- Open water**
- Compartments**
- Sub-Compartments**

- Wet Woodland Management**
Manage under an appropriate shelterwood system. Favour best native tree, focussing on the development of wet woodland and riverine habitat characteristics.

- Establishment Phase**
Natural regeneration from surrounding native seed source

- Clearfell 2017-2021**
Sivicultural thinning until clearfell then leave as open habitat to connect heathlands

- Manage as open habitat**
- Management Access Route**

- Clearfell Beyond 2046**
Sivicultural thinning until clearfell then restock with native broadleaves.
- Clearfell 2042-2046**
Sivicultural thinning until clearfell then restock with a mixture of native broadleaves and conifers
- Clearfell 2027-2031**
Sivicultural thinning until clearfell then restock with a mixture of native broadleaves and conifers
- Coppice**
Coppice understorey in an appropriate relation to benefit biodiversity whilst taking market opportunities to utilise products.
